Public Announcement

Geotechnical Investigation for Pekarzhing & Ammochhu LAPs

This is to inform the general public, residents, and plot owners of Pekarzhing and Ammochhu Local Area Plans (LAPs) that Phuentsholing Thromde, in collaboration with UNDP Bhutan, has awarded the consultancy contract for geotechnical investigations of the Pekarzhing and Ammochhu Local Area Plans (LAPs) to APECS Consultancy.

These investigations are essential for risk-informed urban and infrastructure planning within the Thromde. The project will span approximately four (4) months, during which consultants will conduct site activities, including the excavation of trial pits at selected locations.

Therefore, Phuentsholing Thromde requests the cooperation of all residents and plot owners in the two LAPs. While trial pits may be excavated on private property, consultants are required to backfill all pits upon completion and strictly adhere to safety protocols to prevent damage or inconvenience.

For any queries, concerns, or clarification, please contact **77704790/17245880**.
